06 Testing & Comparison Approach

07 Defects Identified

08 UI Improvement Suggestions

09 Tools & Technologies

10 Work Methodology

11 Learnings & Outcomes

12 Thank You

HOST ORGANIZATION

About Artiscien

Artiscien Software Solutions is a technology and business solutions company focused on providing digital solutions and services to businesses.

My internship covered website testing support, graphic design and UI/UX design. My main assignment was reviewing artiscien.com against the approved Figma file, alongside design work for Artiscien's LinkedIn.

ROLE

Website Testing, Graphic Design & UI/UX Intern

WORK AREAS

Website Testing Support · Graphic Design · UI/UX Design

INTERNSHIP TYPE

Online

DURATION

3 months, from 1 June 2026

MY ROLE

UI/UX Design + Website Testing

01 Website Testing

- Tested pages and components of artiscien.com
- Checked buttons, navigation and interactive elements
- Found content and functional issues

02 UI/UX Design Review

- Compared the live site with the approved Figma file
- Spotted spacing, alignment and visual inconsistencies
- Suggested usability and visual improvements

03 Graphic Design

- Designed a LinkedIn carousel for Artiscien
- Worked in the brand's dark and orange palette
- Supported digital and branding materials

04 Documentation

- Built an Excel report of defects, page-wise
- Wrote clear, ID-tagged defect descriptions
- Logged UI improvement suggestions separately

GRAPHIC DESIGN

LinkedIn Carousel for Artiscien

A designed social post for Artiscien's LinkedIn presence, built in the brand's dark background and orange accent colours.

Headline: "Right People, Right Impact"

The layout pairs a large, high-contrast headline with the Artiscien logo, the website handle and a "Save This Post" call to action.

Brand consistency

Colours and logo follow Artiscien's identity

Readability

Big headline, strong contrast, minimal copy

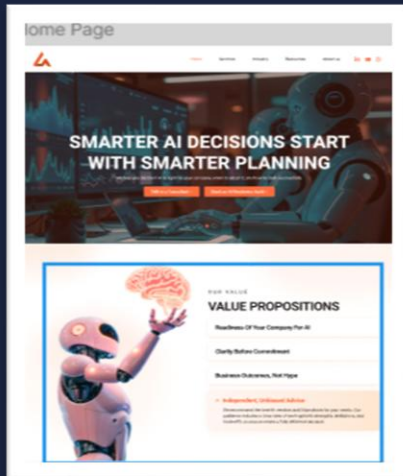

Engagement

Clear call to action at the bottom

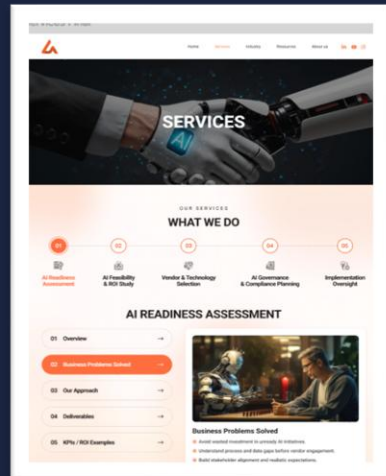

THE WEBSITE

Artiscien Website

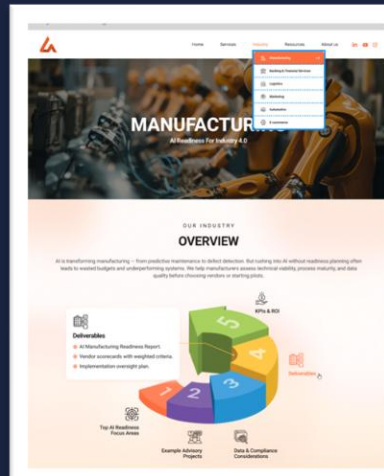

My main duty was to find bugs and improvements on artiscien.com by comparing it with the Figma file the company provided, page by page.

About Us

HOW THE WEBSITE WAS TESTED

Figma → Live Website → Defect Report

Each page was reviewed by comparing the approved Figma design with the implemented live website. Differences in layout, content, spacing, typography, images, functionality and visual hierarchy were documented as defects or UI improvement suggestions.

WEBSITE DEFECTS

Figma vs Live Website

HOME PAGE · 4

- Hero text loses contrast on bright video frames
- Industry cards repeat one Marketing image
- Process step numbers barely visible
- Duplicate testimonial cards

INDUSTRY · 4

- Overview layout differs from Figma
- Repeated Marketing cards (earlier build)
- Case study title wraps due to “#9” suffix (2 entries)

RESOURCES · 5

- Short Videos tab does nothing
- Success Stories page is empty
- Template Download page is empty
- Placeholder “#” numbers in titles
- Lorem Ipsum descriptions

ABOUT · 3

- Hero content vertically misaligned
- Hero image position differs from Figma
- Heading and content spacing inconsistent

16 defects logged and 16 UI improvement suggestions, all in an Excel report

UI IMPROVEMENT

Beyond Bug Identification

Alongside defects, I documented suggestions to make the interface more comfortable, balanced and consistent.

16

UI improvement suggestions

Home 3 · Service 2 · Industry 4 ·
Resources 4 · About 3

Softer orange for active states

6

Hero, service card, footer, navigation, industry card and filter button all use a very saturated orange.

Layout balance & alignment

6

Pie-chart info cards, panel heights, filter toolbar and About-page spacing.

Card spacing consistency

1

Standardise gaps between image, title, text and button in resource cards.

Empty-state design

1

Show a clear message instead of blank Success Stories and Template pages.

Video playback polish

1

Smoother transition when a case-study video starts.

Official social brand colours

1

LinkedIn, YouTube and Instagram icons in their own recognisable colours.

TOOLS OF THE TRADE

Tools & Technologies

Figma	UI/UX design comparison and review
Adobe Photoshop	Graphic design and visual editing
Canva	Design creation and visual content
Microsoft Excel	Defect and UI improvement documentation
Browser DevTools	Website inspection and testing
Live Website	UI and functionality testing

HOW THE WORK WAS DONE

My Testing & Design Workflow

01 Understand

Review the approved Figma design.

02 Explore

Navigate through the live website.

03 Compare

Compare layout, content, spacing, typography and components.

04 Identify

Record differences and functional issues.

05 Document

Assign defect IDs and page names.

06 Recommend

Provide UI improvement suggestions.

WHAT I TAKE AWAY

Key Learnings

UI/UX

- Improved understanding of design consistency
- Learned to evaluate spacing, hierarchy and alignment
- Better understanding of design-to-development implementation

WEBSITE TESTING

- Learned systematic website testing
- Improved ability to identify visual and functional defects
- Learned how to document defects clearly

PROFESSIONAL

- Improved documentation skills
- Learned to communicate design issues professionally
- Experience with real-world website requirements

KEY OUTCOME

An Excel report comparing artiscien.com with its Figma design: 16 defects and 16 UI improvement suggestions across five page groups.

Thank *you.*
